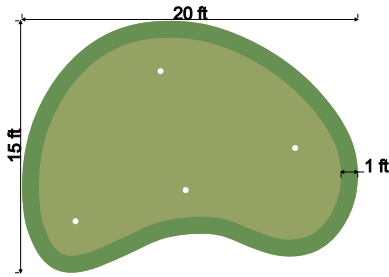

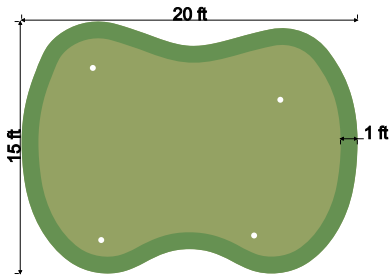

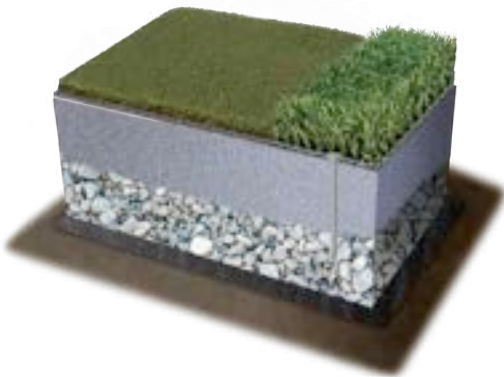

FIGURE EIGHT SHAPE

Construction Detail

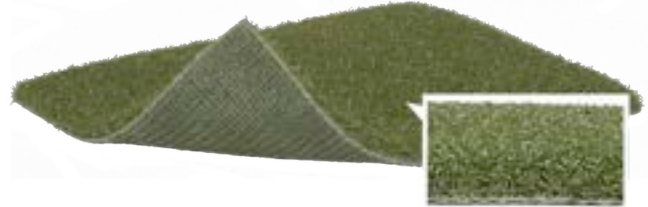

* For installations up to a 10 inch slope.
Anything over 10 inches will be an additional cost.

NP50 (For Putting Area)

THE HIGHEST QUALITY SYNTHETIC TURF FOR GOLF

The NP50 is the premier textured nylon putting surface available in the industry. There is no comparison to the natural ball roll and realistic speeds. The key to the unmatched performance characteristics offered by the NP50 are attributed to the dense, non-directional cross-stitched construction. This synthetic putting surface is preferred by numerous teaching professionals, top rated golf facilities, tour players and avid golfers alike. If you are looking for the highest quality synthetic turf putting surface on the market, then you want to choose NP50. This turf performs best with the high end ceramic infill offered by Synthetic Turf International, but this product can also be used without infill, which makes it an ideal indoor/portable putting surface. When will it be time for you to Experience A Greener World and a better golf game?

Specs: NP50

- Yarn Type: Nylon
- Secondary Backing: Greenback
- Pile Height: 1/2" (+/- 1/8")
- Roll Width: 15'
- Color: Turf Green
- Perforations: No
- Total Product Weight: 83 oz per sq. yard

Soft Lawn Elite Plus

NATURAL LAWN TURF

SoftLawn® Elite Plus is an excellent landscape product, with a thatch layer for added body, reducing the amount of infill needed. The four color blend of this product provides an authentic look and feel that truly resembles a natural lawn. SoftLawn® Elite can be used for landscapes, putting green fringes, playgrounds and pet areas.

Specs: Soft Lawn Elite Plus

- Yarn Type: Nylon
- Secondary Backing: 5mm Polyurethane Foam with Fleece; SilverBack™ Polyurethane
- Total Product Weight: 83 oz. per sq. yd
- Pile Height: 1 1/8"
